

Part 1: Farm School Summer Math work on Khan Academy

Dear Rising 7th, 8th and 9th Grade Students,

This is a note to clarify the expectations for your summer math packet. We have created an account on Khan Academy for you to use this summer. Your login credentials are located at the bottom of this page. If you have an existing Khan account do not use it for this summer homework. When you log into the account we have created for you, you will see that Compass Farm School has given you a list of recommendations. That is where you should start. We have aligned your MAPS scores to Khan and created a recommended list of work and lessons. These lessons are customized to your specific math needs. When you have finish your list of recommendations, move on to other areas you feel are needed. Requirements:

- 15 minutes 3x/week for 11 weeks – that’s a total of 495 minutes (or 8.25 hours).
- Please make sure you finish your assigned recommendations first, then go on to explore other topics.

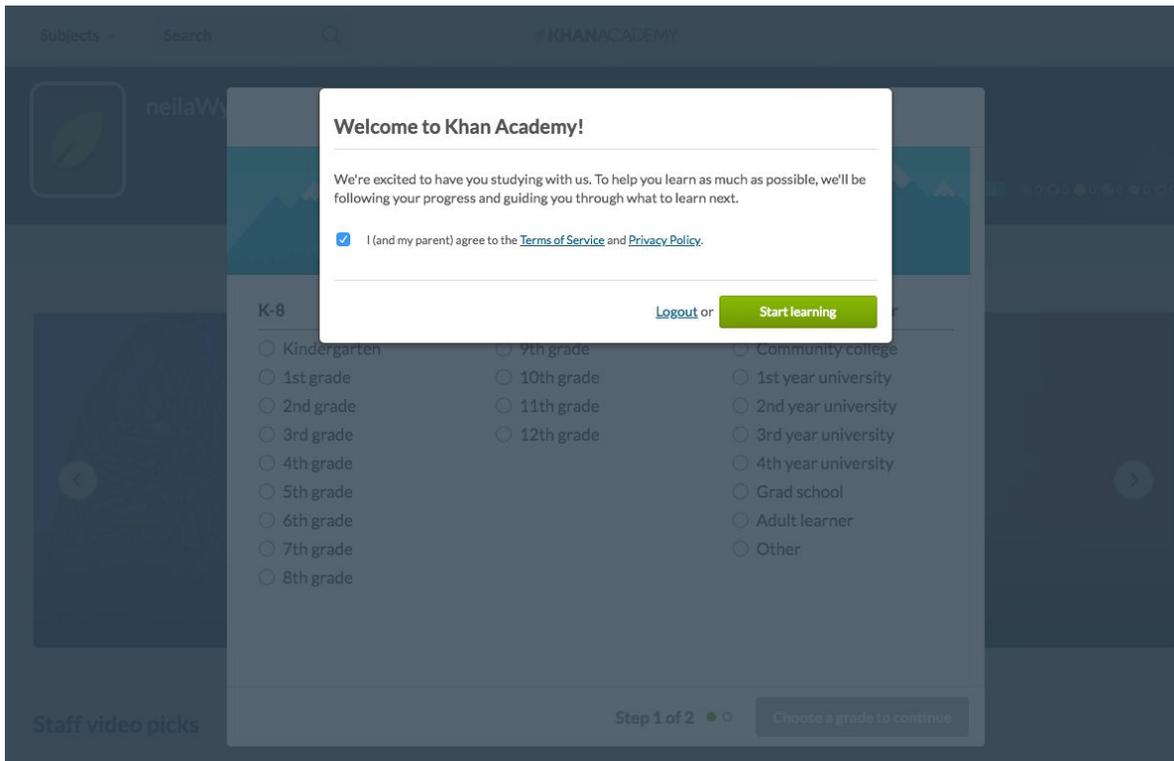

Please note that Khan Academy keeps track of the time you are working, not the time you are logged on. If you are just sitting there, Khan will not count that time. If you are unsure of how many minutes you have completed, go to your **profile**.

Go to Khan Academy online - <https://www.khanacademy.org/>

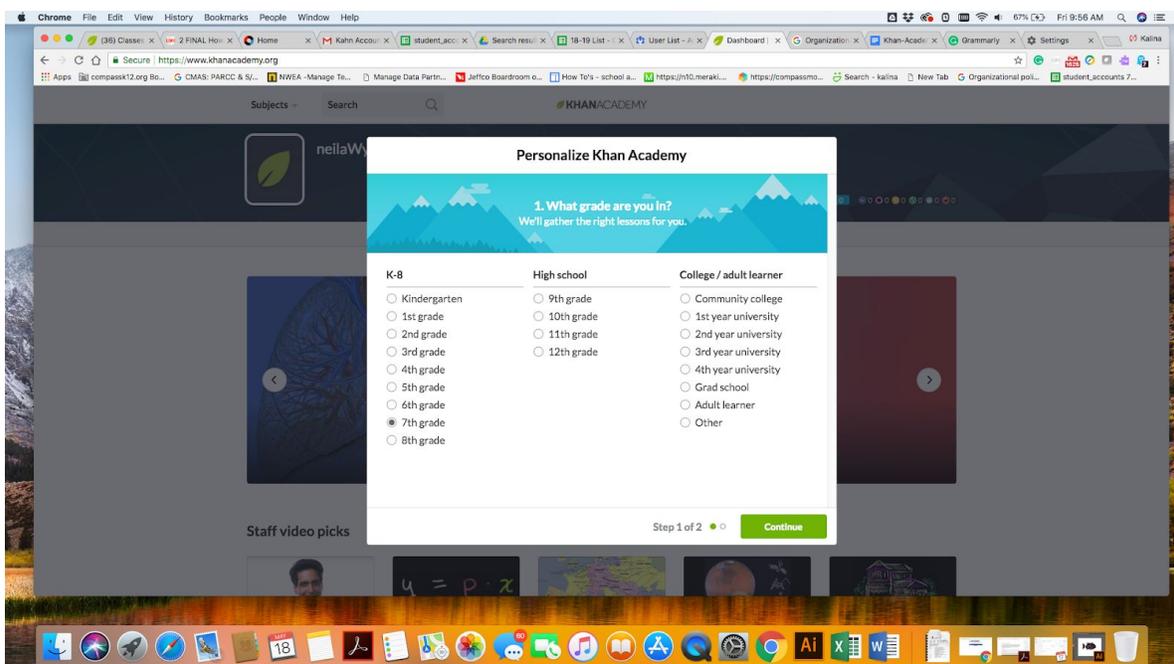

Login in using the following credentials:

Student name	Username	Password

Once there, agree to the terms of service and select **start learning**.

Then select **the grade** that you will be in starting this fall. If you select **coaches** you will see **Farm School** as your coach.

On the upper right side of the page you can set the date range for your activity and then, if you hover over the graph bars you can see that it will give you the time you spent working.

The screenshot shows the Khan Academy interface. At the top, there is a navigation bar with 'Subjects', a search bar, and the 'KHANACADEMY' logo. Below this is a dark blue header with a green leaf icon on the left and social media icons on the right. The main navigation menu includes 'Home', 'Profile', 'Badges', 'Progress' (which is highlighted), 'Projects', and 'Coaches'. The 'Progress' section is active, showing 'Skills', 'Videos', 'Activity', and 'Focus' tabs. The 'Activity' tab is selected, and the date range is set to 'Last 7 days'. The mission is 'Early math'. A progress chart shows 'Total Early math progress' at 0%. A legend indicates: 0 skills mastered (dark teal), 0 skills level two (medium teal), 0 skills level one (light teal), 0 skills practiced (very light teal), and 101 skills not started (grey). Below the chart, a message states 'No activity in the selected date range.'

If you have any questions, please contact Julie Strahan-FS Math Guide jstrahan@compassk12.org. She, along with the rest of the Farm School Math Guides, will also be checking in on you at various times over the summer.

Have a great summer and we look forward to seeing you in the fall!

Sincerely,

Your Farm School Guides
